**Subject:** Methane release

**ENFORCEMENT CONFIDENTIAL – DO NOT RELEASE**

On May 2, 2020, the Florida Gas Transmission Pipeline performed non-routine maintenance at its Brooker facility in Bradford County to repair the combustion turbine, which caused upstream natural gas (methane) to be vented to the atmosphere. Interstate pipelines are regulated at the Federal level. I recommend reaching out to the Federal Energy Regulatory Commission or the U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration.”

Sincerely,

Todd Groendyke
